## DETAILED ACTION

### *Allowable Subject Matter*

Claims 1-4, 12, 21, and 25 are allowed over the prior art.

The following is a statement of reasons for the indication of allowable subject matter:

As per claims 1, and 12,

Isikoff discloses a security method to prohibit access to a computer when a security device (beacon/PCMCIA Card) has been removed from a computer, (Col 4 lines 45-49).

Isikoff discloses storing data in a first storage means (firmware) in which only authorized users are able to change (Col 4 lines 45-50). Isikoff discloses dynamically determining if the security device (beacon) is removed or altered on said computer, and if so, prohibiting access, (Col 4 lines 50-53).

Isikoff does not teach an RFID.

Elledge teaches using an RFID tag in a laptop, (Col 7 lines 12-21, Fig 4).

Kunert teaches that a PCMCIA card has an RF transponder in it (Col 1 lines 26-36).

The Isikoff-Elledge-Kunert combination does not teach “storing data comprising at least an antenna history, antenna error, detect coil, detect enable, tamper and access protection bit regions”. This limitation overcomes the prior art of record.

Claims 2-4, 21, and 25 are allowable due to their dependence on the allowed independent claims 1, and 12.
